

COLLIN CHRISTOPHER SEE

Associate AI Engineer • Data Analytics & AI • Ex-UX Designer • Stand-up Comedian

+65 8318 3723 | NillChris.topher@gmail.com | github.com/CollinChris | linkedin.com/in/collin-see

PROFILE

Associate AI Engineer apprentice at AI Singapore, building an agentic RAG system that automates compliance reporting for an enterprise client. Outside work I ship my own tools, including a Chrome extension live on the Chrome Web Store. A background in UX research and stand-up comedy since 2012 trained me to find what users actually need and explain complex ideas simply; I bring that to building AI products people genuinely use.

PROJECTS

Context Packer — TypeScript, Chrome Extension

collinchr.github.io/context-packer

- Published on the Chrome Web Store: one click turns any web page, GitHub PR thread, or Confluence doc into clean, LLM-ready Markdown with a token estimate, copied to the clipboard.
- Built 6 site-specific extractors (GitHub, Confluence, Notion, Google Docs, SharePoint, Obsidian); runs 100% locally, smoke-tested in headless Chrome against live pages.

Daily System-Design Fact Bot — Python, Gemini API

github.com/CollinChris/systemdesign

- Scheduled GitHub Actions job sends a daily system-design fact or quiz to Telegram; state survives ephemeral runners by committing back to the repo, with idempotent runs that never double-send.
- Self-replenishing content bank via the Gemini API, with retry/backoff and model fallback on rate limits; typed, linted, and covered by 45 tests (pytest, mypy, ruff).

WORK EXPERIENCE

Associate AI Engineer (Apprentice) — AI Singapore

Apr 2026 – Jan 2027

- Building an MVP agentic RAG system that generates automated compliance reports (client under NDA).
- Learning and applying core neural network and machine learning concepts through a structured, hands-on apprenticeship.
- Translating UX research instincts into AI product thinking by identifying the data points and user needs that make a model genuinely useful.

Freelance Stand-up Comedian

2012 – Present

- Developed flexible thinking by regularly performing in new and unpredictable situations.
- Gained deep insight into audience behaviour through constant audience engagement.
- Sharpened public speaking skills, which helps me explain technical findings to non-technical stakeholders.

UX Designer & Researcher — AntBuildz, CyberAAS, Rooral, Burda Luxury Candles, Taby

2021 – 2022

- Led and contributed to end-to-end UX research and design across five projects, from research to prototypes.
- Synthesized user and market data into insights that aligned stakeholder goals with validated user needs.
- Led a team of 3 on market and user research; delivered UI/UX designs under real-world startup constraints.

SKILLS

AI / ML: Agentic RAG, LLM Workflows, Neural Networks, PyTorch, Azure AI Services, Gemini API

Engineering & Data: Python, TypeScript, SQL, GitHub Actions (CI/CD), Agile, Stakeholder Communication

EDUCATION

Professional Diploma in Data Science — Lithan Academy (2024 – 2025)
